WELCOME TO CANVAS!

Canvas is the learning management platform all K-12 students enrolled in the Flex Learning Track (current hybrid model) and K-8 students enrolled in the South Park Cyber Academy will use to access course information, instruction, assignments, activities and more. Canvas replaces Google Classroom. Time will be spent at the beginning of the school year to introduce students to Canvas.

Canvas supports learning, no matter where it happens. Canvas can truly become a one-stop shop for South Park students and families. Canvas is an easy-to-use, cloud-based platform that allows for all of the resources and tools our teachers use to be in one place. Its integration with the district's new student information system, PowerSchool, automatically enrolls students in courses. There's no need for registration codes like other learning management systems. After logging in, students will see summaries of their assignments, announcements and other important information right on their Canvas dashboard. Customized notifications alert students to announcements they need to know. Canvas also supports real-time instruction through Zoom and other video conference programs if the district needs to transition to Remote Learning 2.0.

LOGGING IN TO CANVAS

Students can log in to Canvas from Clever, the portal which launches immediately after a student logs on to his/her Chromebook. The username and password used for Canvas is the same username and password used to log in to the Chromebook and the student's school email. In most instances, a student will be automatically logged in to Canvas. If your child experiences issues logging in to Canvas, please contact your child's teacher or school office.
